1. INTRODUCTION

1.1. OVERVIEW

This Project WPStore (hereinafter referred as this or this project) aims to reduce the efforts to setup affiliate store without writing any code in HTML, CSS, JS and Php.

I am using WordPress as CMS for this website

1.2. PURPOSE

The main purpose of this website is to make a website ready with no coding knowledge and automate the process of updating content in site.

2. LITERATURE SURVEY

2.1. Existing Problem

At presents there are many methods to develop a website but plenty of them require the user to know HTML, CSS, JS or user has to employ people who has knowledge in programming.

This makes difficult for normal user to create websites and standout of crowd

2.2. Proposed Solution

Using WordPress as CMS and with some other add-ons user can easily create website without any coding knowledge.

3. THEORETICAL ANALYSIS

3.1. Block Diagram

3.2. Hardware/Software Designing

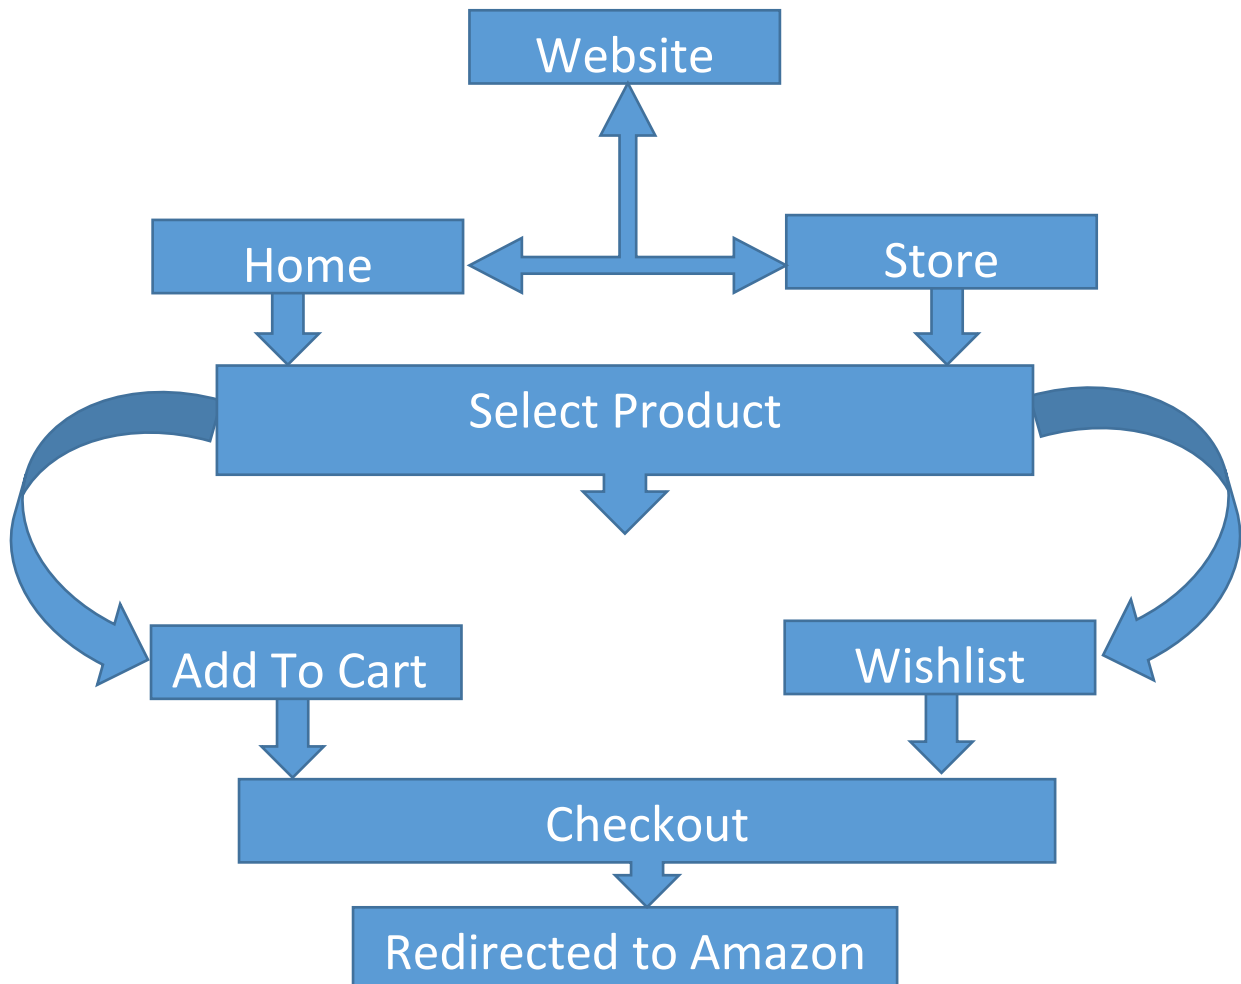

- Any operating system (Windows, Linux, Mac)
- PHP
- Apache server
- SQL server
- WordPress

4. EXPERIMENTAL INVESTIGATIONS

I checked other CMS Like Joomla, Drupal

I checked other frameworks Laravel, CodeIgniter.

5. FLOWCHART

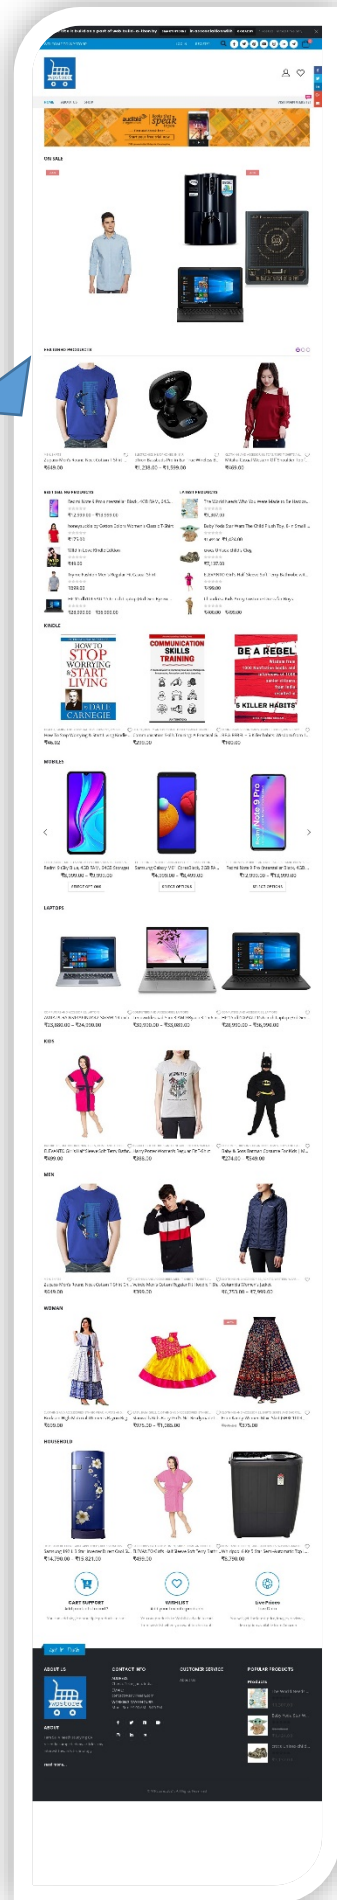

6. RESULT

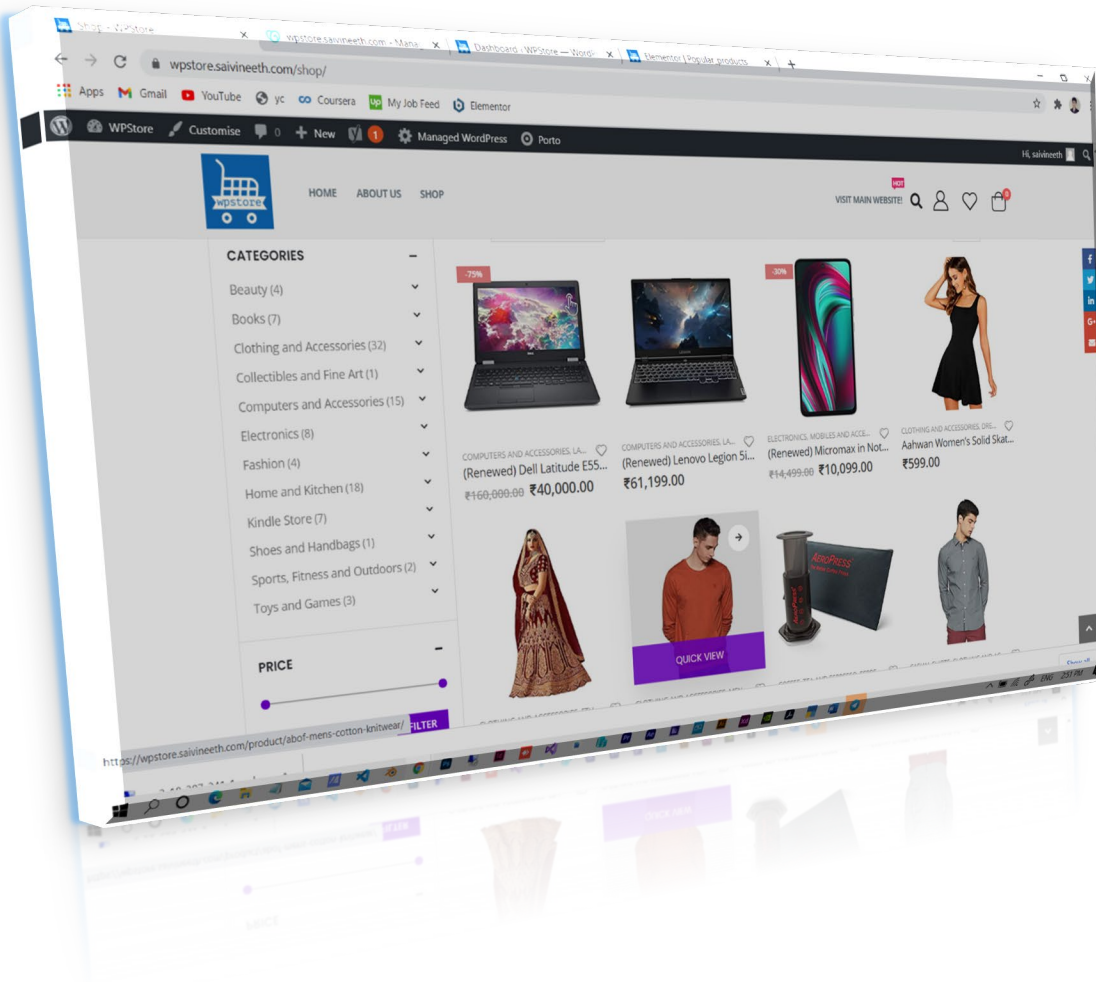

6.1. Mobile Result

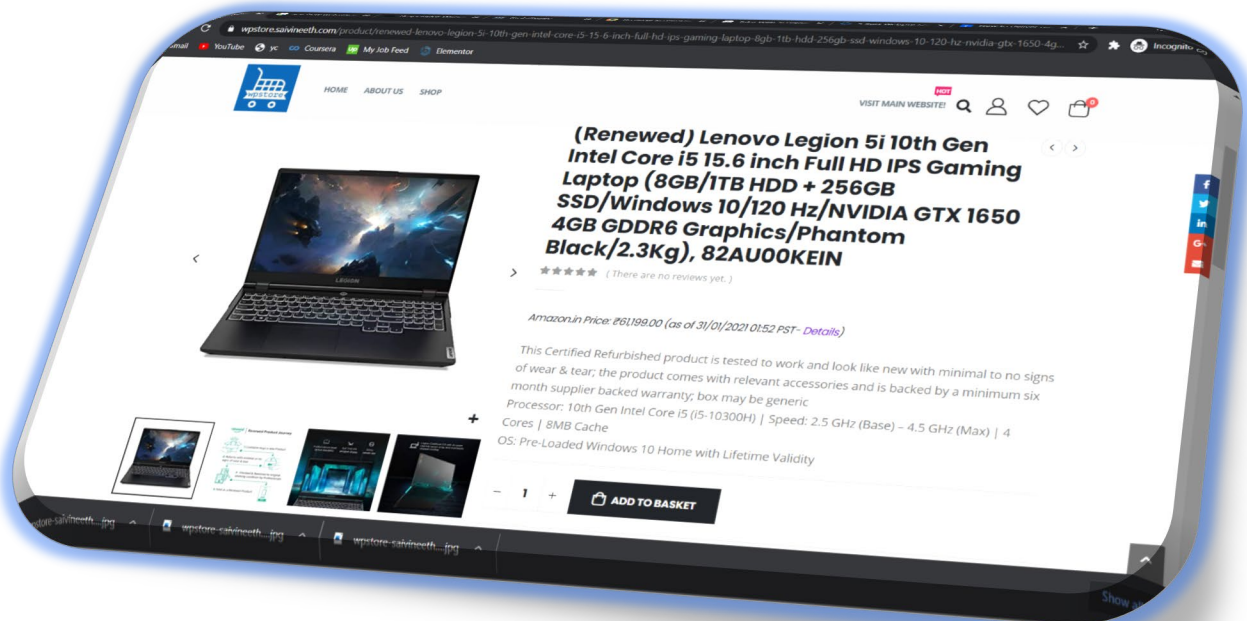

6.2. Desktop Result

Shop View

Single Product View

7. ADVANTAGES & DISADVANTAGES

- With This website we can automatically insert products from amazon using wzoo plugin
- Users can add their products to cart i.e., they can purchase multiple products without leaving site
- Users can add items to Wishlist
- The size of page is bigger – con

8. APPLICATIONS

- In future we can add other vendor (Flipkart) products also
- We can add our products and accept payments
- We can setup drop shipping facility also

9. CONCLUSION

Finally, without writing single line of code we can create a full affiliate store with cart, Wishlist and user registration facilities

10. FUTURE SCOPE

- We can either extend the store and add products from other affiliate vendors
- We can convert it to multivendor site user uploaded content

11. BIBILOGRAPHY

- I Don't Have any previous works but currently I am developing
 - A new website based on Django <https://www.saivineeth.com/>
 - An Excel-add in(Custom workbook) that automates Tally accounting entry from excel
